

Beyond the Hype: Practical AI for Commercial Property

AI In Action

Hello!

Lorenzo Sardoz

Team Lead - Quota Sales

lorenzo.sardoz@mrisoftware.com

Real estate operators have less room for error than ever before

	RISK	IMPACT
Occupancy & revenue instability	Staffing shortages impact service levels for maintenance, experience, and renewals	3X the cost of replacing vs. retaining residents or tenants
Operating cost pressure	Insurance, taxes, maintenance, and labor costs are rising simultaneously	6-10% annual increase in real estate operating costs
Capital & investor scrutiny	Increased debt costs coupled with NOI pressure makes capital more selective	100-300 basis pts. NOI decreases across sectors
Regulatory & compliance exposure	Fair housing, building safety, financial reporting, and ESG requirements compound	72% say compliance complexity is hurting profitability

These problems are compounded by workflows that lack continuity, context, and automation

From system of record to system of intelligence & execution

Automate

MRI Agora Intelligence

Watch your operation continuously, surfacing anomalies, trends, and risks automatically

Signals surface before you know to look for them - the answers, and the actions, find you

Understand the data behind the signal with Ask Agora

1. Reduce unplanned maintenance
2. Improve lead-to-lease conversion rates
3. Reduce time to lease/vacancy duration

MRI Agora Orchestrator

AUTOMATE

Execute repeatable work automatically, surfacing exceptions for human judgment

Your team governs outcomes, not tasks, and operates at a fundamentally different level

1. Reduction in manual errors
2. Days to close monthly financials
3. % of compliance processes automated

RISK

High Impact • High Confidence

Emerging HVAC instability detected at Lakeview Medical Offices

+42% reactive HVAC work orders

Why: Rising reactive HVAC work orders, cost increases, and early tenant impact signals indicate emerging asset instability that could lead to further failures and disruption if not addressed proactively.
